

1 "More, longer, and faster trains."

All day half-hourly frequency King's Lynn-King's Cross.

- * greatly improved connectivity at Ely (to North/Midlands/Norwich/Ipswich).
- * greatly improved connectivity at Cambridge (to Stansted Airport/Stratford/Liverpool Street).
- * greatly improved connectivity at King's Cross/St.Pancras International (National Rail/Eurostar).
- * more operational flexibility (e.g. turning services short when disruption/cancellations) – more acceptable to passengers, as delays shortened.
- * frequency enhancement is a proven traffic-building stimulus.

Longer trains north of Cambridge.

- * problems south of Cambridge being addressed with 8- and 12-car trains.
- * existing 4-car portions north of Cambridge overcrowded on peak services.

All trains non-stop between Cambridge and King's Cross.

- * speed is a proven traffic-building stimulus.

Notes - (1) Fen Line Timetable Metrics should be used for broad comparison purposes only. (2) 'Best' results indicate earliest/latest times, fastest journey duration, etc., as appropriate. (3) Minor changes may not always be significant to individual passengers, 'best' may not always be best for an individual. (4) Brackets show change of trains required, usually from/to King's Lynn-Liverpool Street route trains. (5) Except where the context requires it, not all services included are to/from London, e.g. early morning Cambridge-King's Lynn services. (6) Not all services included. The principal exclusions are Ely-Cambridge diesel services. (7) In the interests of clarity, minor arrival/departure time changes are not always shown. (8) Caution should be exercised in using time-band counts; a change of plus or minus one minute between timetables can modify the counts without significant change having taken place. (9) Where two journey durations are shown, separated by a '/', the first figure refers to trains omitting calls at WTG, LTP, and WBC As at 3 November 2010.

Notes - (1) Fen Line Timetable Metrics should be used for broad comparison purposes only. (2) 'Best' results indicate earliest/latest times, fastest journey duration, etc., as appropriate. (3) Minor changes may not always be significant to individual passengers, 'best' may not always be best for an individual. (4) Brackets show change of trains required, usually from/to King's Lynn-Liverpool Street route trains. (5) Except where the context requires it, not all services included are to/from London, e.g. early morning Cambridge-King's Lynn services. (6) Not all services included. The principal exclusions are Ely-Cambridge diesel services. (7) In the interests of clarity, minor arrival/departure time changes are not always shown. (8) Caution should be exercised in using time-band counts; a change of plus or minus one minute between timetables can modify the counts without significant change having taken place. (9) Where two journey durations are shown, separated by a '/', the first figure refers to trains omitting calls at WTG, LTP, and WBC. As at 3 November 2010.
